

SMART WORKSPACE SOLUTIONS

Bring your office into
the digital future and
transform your business.

Business Can Be Simple

WELCOME TO THE SMART WORKSPACE SOLUTIONS

Transform your business with a suite of contactless digital systems that accommodate both employees and visitors. Powered by **Advanced Face Recognition Technology** and **Smile Recognition Technology**, you can manage your entire workspace seamlessly with enhanced efficiency and security while lifting office morale.

VISITOR MANAGEMENT SYSTEM

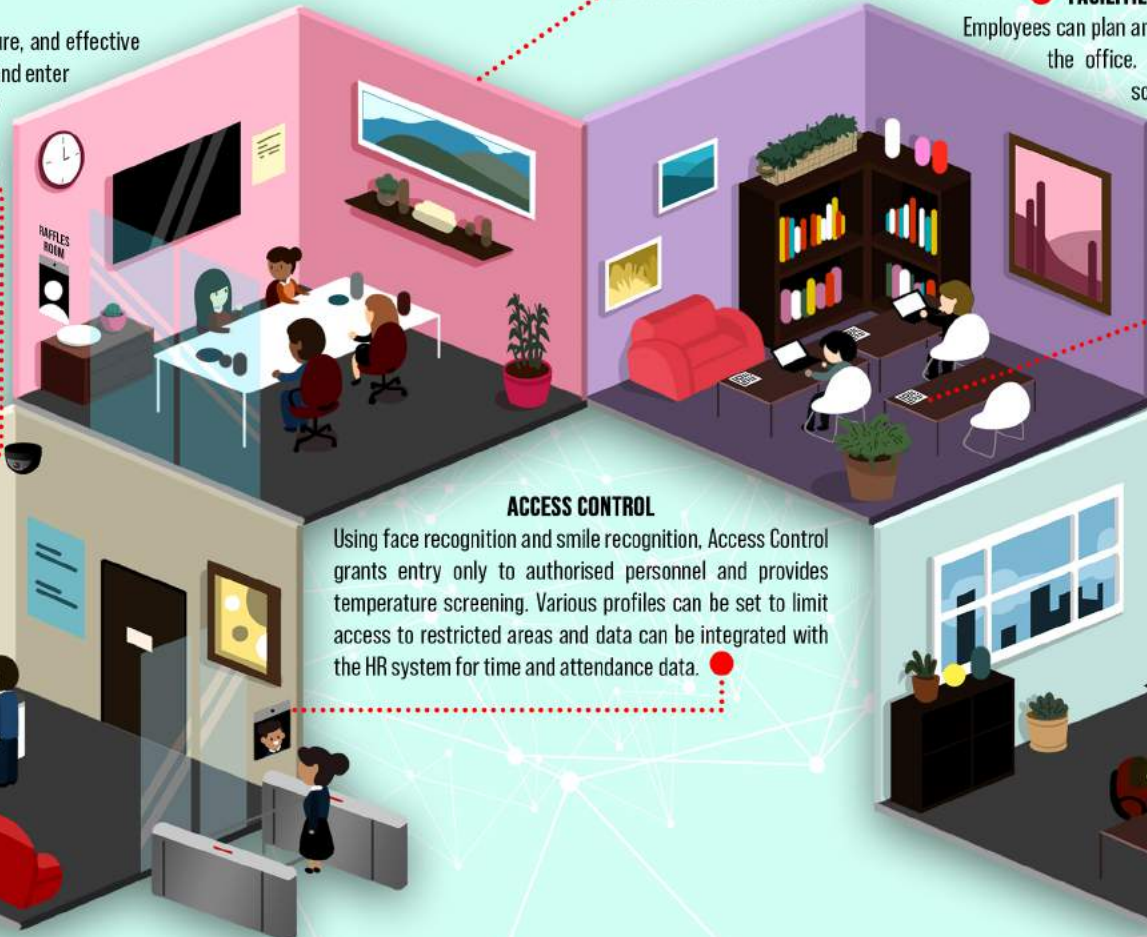

Managing your guests can now be done in a fast, secure, and effective manner. Guests simply register with a quick face scan and enter their details. Digital data is kept on file for easy management. On return visits, they will be greeted with a welcome message for a personalised touch.

TEMPERATURE SCREENING CONTROL

All-in-one contactless temperature screening with facial detection allows businesses to efficiently keep track of their employees and visitors for contact-tracing purposes.

Scan the QR code to view the Smart Workspace Solution video.

FACILITIES BOOKING SYSTEM : ROOM BOOKING / HOT DESK BOOKING

Employees can plan and book a room/desk prior to a meeting or their arrival at the office. Meeting notifications will be sent to each guest. By scanning a QR code on the desk or via face recognition on the tablet, employees can easily check in to the facilities or hot desk. Insightful data from statistical analysis reports will be generated for efficient space planning or crowd management.

SECURE PRINTING CONTROL

Printing sensitive documents can now be done securely and at greater convenience with Canon Multi-function devices using uniFLOW print management! Documents are released to authorised personnel (sender) only after identity is authenticated. Employees can also scan and send documents securely to their email account or their document management systems.

ACCESS CONTROL

Using face recognition and smile recognition, Access Control grants entry only to authorised personnel and provides temperature screening. Various profiles can be set to limit access to restricted areas and data can be integrated with the HR system for time and attendance data.

ADVANCED FACE RECOGNITION TECHNOLOGY

Works even with masked faces, as deep learning capabilities allow it to compare real-time data to stored data. Requires an actual face for authentication, which prevents spoofing.

- ✓ Secure, convenient, and reduces administrative workload.
- ✓ Useful data for resource planning and attendance monitoring.
- ✓ Customisable & Scalable according to individual requirements.

SMILE RECOGNITION TECHNOLOGY

Brighten up the workspace environment with a smile! While accessing the office, you can give a big smile to start the day well.

Smart Office of the Future

Embrace the digital future transformation and equip your office with complementary digital solutions. Stay connected easily with remote collaboration tools for instant access to documents and video conferencing, while protecting them against cybersecurity threats.

Collaboration Tools

Microsoft 365, a cloud-based subscription service, brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.

Virtual Conferencing

To kickstart a remote group meeting on Zoom, Teams or Webex, all you need is a login account! The technologically advanced, all-in-one Interactive Display Panel is equipped with in-built features like writing tools, camera, mics, and speakers, efficiently transforming traditional meetings, presentations, and conference calls into a seamless experience.

IP Telephony

With a cloud-based PBX solution, you can communicate anywhere on any personal or corporate device with instant messaging or video conferencing functions.

Cybersecurity

With digital solutions, Cybersecurity is paramount! Endpoints must be protected from ransomware and zero-day threats! An easy-to-use, cloud-based solution can now safeguard your devices from malware attacks and detect and alert you to malicious activity. Protection does not have to come at a huge cost to your system resources if you start now.

Let Canon Singapore be your Trusted Partner in addressing your Digital Transformation needs through the adoption of technologies and solutions. Email us at b2bsales@canon.com.sg to find out more.
