DRIVING THE PULSE OF BUSINESS

ONE PLATFORM FOR SECURE PRINT, COPY, AND SCAN MANAGEMENT

uniFLOW BRINGS A WHOLE NEW LEVEL OF PRODUCTIVITY AND SECURITY TO YOUR BUSINESS.

And yet, it retains Canon's trademark simplicity for efficient document flow. It is a secure platform for print, copy and scan management with full device control and improved failsafe resilience. With uniFLOW, your document workflow is fully tracked and optimised to conserve resources. ▶

Drive the pulse of your business. With uniFLOW.

SECURITY & RESILIENCE FOR YOUR BUSINESS

End-to-End Document Security

uniFLOW secures your document from creation to distribution. Whether this is at the multifunctional device, or on laptop, the document is protected by secure mechanisms.

Secure and Control Your Document Flow

Security control ensures only the right person receives the printout, which is not released until the person is physically present and authenticated. Similarly, access control rules can be set for specific multifunction devices to cater to the functions of specific users or groups.

In-built Resilience and Intelligence

uniFLOW even comes with built-in software failsafe. The software has the capability to re-assign resources and performs faster recovery without the need for potentially costly hardware.

INTEGRAL SCAN
WORKFLOW OPTIMISATION

Perfect Integration for Seamless Workflows

uniFLOW's deep integration with Canon multifunctional devices ensures seamless workflows for the organisation. Automated form processing extracts data with high speed and accuracy. Documents can be compressed and encrypted into secure PDFs. The scanned documents can contain metadata that is indexed with the backend systems for greater accountability.

CAPTURE

MFD with ID card login   Smartphone   Hotfolder

Scan with Security and Convenience

Whichever imageRUNNER ADVANCE device the user attempts a scan, a secure list of their personal scan destinations is shown to them. This feature ensures security and prevents accidental distribution to non-intended recipients.

PROCESS

Forms Processing

Microsoft® Word; .docx/xml; Excel®

PDF; PDF/A; Encrypted PDF

Blank Page Recognisation

Database Validation

High Compression

Deskewing

Despeckling

Orientation Detection

Line-, Dark Border-, Dither Removal

Barcode Recognisation

Zone OCR (137 Languages)

DISTRIBUTE

Tight Integration with Various Applications

uniFLOW is compatible with various applications for document scanning. Documents scanned at the MFD can be sent to back-end systems, cloud destinations, document management systems (DMS), or enterprise content management (ECM) systems. This allows the organisation to manage documents effectively, and easily retrieve them when necessary.

Supported applications include Evernote®, Microsoft® OneDrive®, Box™, DropBox™, Google Drive™, Microsoft® SharePoint®, Microsoft® Exchange™, Therefore™, network folder, FTP, and more.

HASSLE-FREE PRINTING

Print and Collect Anywhere Within the Network

Users can enjoy the convenience of MyPrintAnywhere feature at any networked print device. This is particularly useful when visiting a different department or floor, or when one needs that critical printout near the meeting room.

Universal Secure Mobile Printing

For the modern mobile workers, we have made it easy to perform mobile printing from a wide variety of devices and platforms. The process remains as secure and intuitive as printing from desktops.

PROVEN PRODUCTIVITY
AND CONTROL

Optimisation of Resources via Smart Rule-based Controls

Resources and profitability are inextricably linked to any company. To optimise resource use and reduce wastage, administrators can implement rule-based controls and set user budget constraints. This ensures resource accountability, and easier cost accounting across departments.

Effortless Full Control of Devices

uniFLOW gives administrators easy control and monitoring of the entire multifunctional device fleet within the organisation, thereby freeing time for other important work.

EVALUATE

Full Tracking for Costing and Accountability

Through it all, every document scanned, copied or printed is also tracked. This tracking enables greater security, as well as cost and environment impact calculation. Reports can be generated according to schedule (such as financial month end), or on ad hoc basis.

Improved Reporting for Better Decision Making

uniFLOW's reporting tools have also been upgraded based on past user feedback. These tools help create clearer reviews, which in turn allows for more accurate forecast and usage adjustment.

Today's businesses are more competitive than ever before. Organisations must secure their businesses without losing pace or productivity. And if you want a platform to achieve exactly that:

DRIVE THE PULSE OF YOUR BUSINESS WITH uniFLOW.
